He has medium experience in the application scope, in structured analysis, in specifying, in design, in programming, in reviewing, in Ada 95, in C++, with German and with English. His medium experience holds for all notations used in the following German-language artefacts: analysis documents, specifications, system and module design documents, and manuals.

However, he has only very little knowledge in no respect at all.

3.2 INFORMATION ABOUT BERND

For Bernd you have to pay 40.0 EUR per hour.

Bernd is highly experienced in the following respects: in reviewing and with manuals in German.

He has medium experience in the application scope, in structured analysis, in specifying, in Ada 95, in C++, with German and with English. His medium experience holds for all notations used in the following German-language artefacts: analysis documents, specifications, and system and module design documents.

However, he has only very little knowledge in design and in programming.

3.3 INFORMATION ABOUT CHRISTINE

Christine costs you 45.0 EUR per hour.

Christine is highly experienced in the following respects: in design, and with system and module design documents in German.

She has medium experience in the application scope, in structured analysis, in specifying, in programming, in reviewing, in C++, in Ada 95, with German and with English. Her medium experience holds for all notations used in the following German-language artefacts: analysis documents, specifications, and manuals.

However, she has only very little knowledge in no respect at all.

3.4 INFORMATION ABOUT DIANA

Because of her abilities, Diana gets 40.0 EUR per hour.

She is highly experienced in the following areas: in programming and in Ada 95.

She has medium experience in: structured analysis, design, in reviewing, in C++, with German and with English. Her medium experience holds for all notations used in the following German-language artefacts: analysis documents, specifications, system and module design documents, and manuals.

Finally, she has only little experience in the application scope and in specifying.

3.5 INFORMATION ABOUT RICHARD

Richard costs you 50.0 EUR per hour.

Richard is highly experienced in the following respects: in specifying, in design, especially with German specification and system design documents.

He has medium experience in: the application scope, in structured analysis, in programming, in Ada 95, in C++, with German and with English. His medium experience holds for all notations used in the following German-language artefacts: analysis documents, module design documents, and manuals.

However, he has only very little knowledge in reviewing.

3.6 INFORMATION ABOUT STEFANIE

Stefanie is calculated with 40.0 EUR per hour.

She is highly experienced in the following areas: in reviewing.

She has medium experience in: the application scope, with structured analysis, in specifying, in design, in C++, in Ada 95, with German and with English. Her medium experience holds for all notations used in the following German-language artefacts: analysis documents, specifications, system and module design documents, and manuals.

However, she has only very little knowledge in programming.

3.7 INFORMATION ABOUT THOMAS

For Thomas you have to pay 45.0 EUR per hour.

Thomas is highly experienced in the following respects: in the application scope, especially with German analysis documents.

He has medium experience in structured analysis, in specifying, in design, in programming, in reviewing, in Ada 95, in C++, with German and with English. His medium experience holds for all notations used in the following German-language artefacts: specifications, system and module design documents, and manuals.

However, he has only very little knowledge in no respect at all.
